Global Trends in Commodities Market

May 2023

Table of Contents

INTRODUCTION
Scope
Key takeaways
Production output of key commodities stagnates in 2022
Key trends shaping the future of commodity markets
Global quarterly prices of key commodities

AGRICULTURAL COMMODITIES
Global production of agricultural commodities stabilizes
China and the US remain the key global suppliers of agricultural commodities
Weaker demand and improving supply help to cap price growth of agricultural commodities
Food and beverages sector to drive demand growth for agricultural commodities

ENERGY COMMODITIES
Slower global economic growth to limit production of energy
US expected to strengthen its position in the global energy market
Energy prices stabilise but risks remain
Weak growth of manufacturing sector to constrain demand for energy commodities

METALS COMMODITIES
Weaker B2B demand contributes to slow production volume growth of metals
China remains the key supplier of industrial metals to the global market
Insufficient supply remains the key risk to price stability of metals
Underperforming metal products and machinery sectors to cap demand for metal ores

KEY COMMODITY SNAPSHOTS
Global production overview of wheat
Higher wheat prices encourage production output expansion
Global production overview of rice
India forecast to drive rice output growth and exports
Global production overview of sugar cane
Adverse weather conditions expected to hurt production of sugar cane
Global production overview of poultry
Growing demand in emerging markets to support production output growth of poultry
Global production overview of cotton lint
Cotton lint production predicted to fall due to decline in area harvested
Global production overview of crude oil and natural gas liquids
Weaker demand to cap production output of crude oil
Global production overview of natural gas
Natural gas production forecast to improve as output in the US increases
Global production overview of coal, peat and oil shale
Coal production forecast to show moderate growth in 2023 thanks to the demand in Asia
Global production overview of crude steel
Emerging countries to drive steel production growth
Global production overview of aluminium
Aluminium demand to slow due to weaker economy, yet long-term outlook remains positive
Global production overview of copper
Growing demand and slow output growth may create market imbalances
Global production overview of nickel
Weaker demand and improved supply to help stabilise nickel prices
Global production overview of lithium
Long mining project cycles and rising demand to add to lithium shortages

CONCLUSION

Key takeaways

About Euromonitor International

Euromonitor International is an independent market intelligence provider. Data, insight and analysis stem from in-the-field research spanning 210 national markets.

Content ranges from the in-depth and country-specific, to key strategic themes with a global range and significance. Products cover a comprehensive range of insights and market data, but can be broadly categorised as:

- Strategy Briefings: Global or regional in scope, and focussing on the most important themes shaping consumer demand, the key markets, competitive environment and future outlook across a range of industries.
- Company Profiles: Analysis dedicated to the world's most significant companies, with detailed insight into their activities, focus of operations, their competitors, their geographic presence and performance.
- Country Reports: For an in-depth understanding of specific countries, whether by industry, economic metrics or consumer trends and lifestyles. These reports cover current trends, consumer demand, market potential and future prospects, with country-specific local insight and comprehensive data, unavailable elsewhere.
